EDUCATION

Texas Tech University, Lubbock, TX

GPA: 3.9 / 4.0

B.S. in Computer Science

Expected: May 2027

Accelerated B.S./M.S. in Software and Security Engineering

Expected: May 2028

Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Software Engineering, Machine Learning, Computer Security

Honors: President's List (Fall 2024, Spring 2025, Fall 2025), Dean's List (Fall 2023, Spring 2024)

EXPERIENCE

Texas Tech University - Rawls College of Business

January 2026 - Present

Web Student Assistant

- Improved the Rawls College website to **90% ADA accessibility compliance** (HTML, CSS, JS, CMS)
- Standardized content workflows, improving site usability and update turnaround

Health, Safety & Environment

June 2025 - August 2025

Software Engineer Intern - Machine Learning

- Owned the evaluation and quality layer of a production **RAG system** (LlamaIndex, Azure OpenAI, Azure AI Search)
- Built a 30-question test set and **RAGAS** pipeline to score faithfulness and context precision/recall
- Tested **12 chunking/retrieval configurations**, raising context precision from **68% to 82%**
- Improved faithfulness from **79% to 91%** via semantic chunking and hybrid search tuning

PROJECTS

Multi-Agent AI Website Generation Platform (HackTX Prize Winner - UT Austin)

October 2025

Next.js · Node.js · DigitalOcean AI Agents · GitHub API · OAuth

- Built a **multi-agent AI system** that generates and deploys full-stack websites from prompts
- Coordinated agents for code generation, dependency installation, and cloud deployment
- Added a real-time dashboard (NextAuth) to track agent execution and deployment status

Full-Stack E-Commerce Platform (Marimar Crochet)

December 2024 - April 2025

MongoDB · Express · React · Node.js · JWT backend • frontend

- Built and deployed a production e-commerce platform with **20+ real customer orders**
- Designed REST APIs for products, users, carts, and orders (JWT auth, role-based access)
- Implemented admin and customer features: product management, search, and order tracking

FELLOWSHIPS & PROGRAMS

Break Through Tech AI (Cornell Tech), AI/ML Fellow

May 2026 - Present

- Selected for a 1-year competitive fellowship with an industry-partnered capstone project
- Completed **Machine Learning Foundations** (Cornell Tech); earned Cornell certificate

Oregon State University

September 2026 - Present

Socio-Environmental Analysis Lab, Break Through Tech AI Studio Capstone

- Co-developing a classification model to forecast **harmful algal bloom risk** in coastal ecosystems
- Processed 11,100+ oceanographic records into an **~8,000-sample** training set from Copernicus Marine data
- Engineered **20+ predictive features**; built a leave-future-out cross-validation pipeline
- Benchmarking **Random Forest** and **Gradient Boosting** models for deployment

LEADERSHIP & INVOLVEMENT

CodePath @ Texas Tech, Full-Stack Developer

January 2025 - Present

- Engineered real-time features (Node.js, Express, WebSockets) for live attendance, quizzes, and Q&A
- Run sprint planning and agile coordination in Jira

Society of Hispanic Professional Engineers (SHPE), Mentor

August 2024 - Present

- Mentor underclassmen in data structures, OOP, and career prep through study sessions and 1:1 guidance

Technical Skills

Languages: Go, Python, JavaScript/TypeScript, Java, C, SQL

Backend & Frontend: Node.js, Express.js, FastAPI, REST APIs, React, Next.js, PostgreSQL, JWT

Cloud, DevOps & Tools: Docker, AWS, Azure (OpenAI, AI Search, App Service), CI/CD (GitHub Actions, Azure DevOps), Linux, Git

AI / ML: PyTorch, scikit-learn, Random Forest, SMOTE, LLMs, RAG (LlamaIndex, RAGAS), Multi-Agent Systems, Streamlit

Spoken Languages: English, Spanish (bilingual)
