EDUCATION

Texas Tech University, Lubbock, TX **GPA: 3.9 / 4.0**
B.S. in Computer Science Expected: May 2027
Accelerated B.S./M.S. in Software and Security Engineering Expected: May 2028
Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Software Engineering, Machine Learning, Computer Security
Honors: President's List (Fall 2024, Spring 2025, Fall 2025); Dean's List (Fall 2023, Spring 2024, Spring 2026)

EXPERIENCE

Texas Tech University - Rawls College of Business January 2026 - Present
Web Student Assistant
- Improved the Rawls College website to **90% ADA accessibility compliance** (HTML, CSS, JS, CMS)
- Standardized content workflows, improving site usability and update turnaround

Health, Safety & Environment June 2025 - August 2025
Software Engineer Intern - Machine Learning
- Owned the evaluation and quality layer of a **RAG system** (LlamaIndex, Azure OpenAI, Azure AI Search)
- Built a **30-question test set** and RAGAS pipeline to score faithfulness and context precision/recall
- Tested **12 chunking/retrieval configurations**, raising context precision from **68% to 82%**
- Improved faithfulness from **79% to 91%** via semantic chunking and hybrid search tuning

PROJECTS

Multi-Agent AI Website Generation Platform October 2025
HackTX Prize Winner - UT Austin | Next.js, Node.js, DigitalOcean AI Agents, GitHub API, OAuth
- Built a **multi-agent AI system** that generates and deploys **full-stack websites** from prompts
- Coordinated agents for **code generation**, dependency installation, and **cloud deployment**
- Added a **real-time dashboard** (**NextAuth**) to track agent execution and deployment status

Full-Stack E-Commerce Platform (Marimar Crochet) December 2024 - April 2025
MongoDB, Express, React, Node.js, JWT
- Built and deployed a production e-commerce platform with **20+ real customer orders**
- Designed REST APIs for products, users, carts, and orders (JWT auth, role-based access)
- Implemented admin and customer features: product management, search, and order tracking

FELLOWSHIPS & PROGRAMS

Break Through Tech AI (Cornell Tech), AI/ML Fellow May 2026 - Present
- Selected for a 1-year competitive fellowship with an industry-partnered capstone project
- Completed **Machine Learning Foundations** (Cornell Tech); earned Cornell certificate

Oregon State University September 2026 - Present
Socio-Environmental Analysis Lab, Break Through Tech AI Studio Capstone
- Co-developing a classification model to forecast harmful algal bloom risk in coastal ecosystems
- Processed **11,100+ records** into an approximately **8,000-sample** training set from Copernicus Marine data
- Engineered **20+ predictive features**; built a leave-future-out cross-validation pipeline

LEADERSHIP & INVOLVEMENT

CodePath @ Texas Tech, Full-Stack Developer January 2025 - Present
- Collaborate with the TTU CS Department on an app improving student-professor communication
- Engineered real-time features (Node.js, Express, WebSockets) for live attendance, quizzes, and Q&A
- Attend hackathons with the team, representing Texas Tech University

Society of Hispanic Professional Engineers (SHPE), Mentor August 2024 - Present
- Mentor underclassmen in data structures, OOP, and career prep through study sessions and 1:1 guidance

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, SQL
Backend & Frontend: Node.js, Express.js, REST APIs, React, Next.js, PostgreSQL, JWT
Cloud & DevOps: Docker, AWS, Azure (OpenAI, AI Search, App Service), GitHub Actions, Azure DevOps
Tools: Linux, Git
AI / ML: PyTorch, scikit-learn, LLMs, RAG (LlamaIndex, RAGAS), Multi-Agent Systems, Streamlit
Spoken Languages: English, Spanish (bilingual)
